RELOADING FOR RHINO BULLETS:

1. Bullets must have jump to rifle land of at least 1 to 2mm
 2. Use standard Somchem reloading tables (not Barnes tables)
 3. Start at starting load and work up your loads keeping a careful watch for signs of pressure.
 4. If the specific bullet weight is not in the reloading tables you do the following:
 - a) For every 10grs the bullets is heavier than the bullet in the reloading book you drop your minimum load by 1gr
 - b) If the bullet is lighter than the loads given in the reloading book, you increase your minimum load by 1gr
- It is important that you watch for signs of excessive pressure.
We do not give a maximum load as each rifles maximum load differs depending how tight the barrel is.
5. The powder you choose should fill your case at least 80%.
